6 Acknowledgement of variability

In this section, I refers to the proposed owner(s).

I acknowledge there are many variables that can affect an insurance policy's performance, including the following (where applicable):

- the type of and future investment performance of the Investment account option(s) selected
- the future investment performance of the participating account
- future dividend scales
- the timing and amount of future payments to and withdrawals from the policy
- the cost of insurance
- mortality and morbidity rates, lapse rates and expenses
- policy loans, and
- future federal income tax rules and provincial income and premium taxes.

More specifically, I understand interest rates, future dividend scales and the performance of securities markets in particular can fluctuate significantly and that even a small change in any one of these variables could have a dramatic negative or positive impact on the policy's non-guaranteed benefits and values. I understand that past performance does not predict nor is it a good indicator of future results.

I acknowledge that any illustrations shown to me in connection with the sale of the policy will not become part of the policy and were provided solely to show me how policy values may change over time based on different sets of assumptions.

I understand that, unless indicated as 'Guaranteed', the benefits and values in an illustration are not guaranteed, are hypothetical only and are based on assumptions that are certain to change. I realize they are neither an estimate nor a guarantee of future policy performance.

I understand actual results will differ upward or downward from those illustrated because they are highly dependent upon a number of variables (including those listed above) and that even a small change in any one of these variables could have a dramatic negative or positive impact on the non-guaranteed figures shown in an illustration.
