

Sun Life Illustrations (4.0.1)

This desktop version is available on January 8, 2018 and it includes the following updates:

- New multi-illustration capabilities. This new capability allows you to group multiple illustrations within one saved case. You can have up to five illustrations in each case. The illustrations in the case can be for the same product or various products, same clients or different clients. For example, you can have multiple Par illustrations in one case, or you can include Par, UL, GIF, Term and CII all in one case.
- There is a tip sheet on using the multi-illustration capabilities under the General section of Sun Life Illustrations help from the Advisor site > Tools and Illustrations page.

NOTE: The New **Compare** feature for cases that include more than one life insurance illustration is available **only** on the web version.

- A new option to open saved cases with the **Search all saved cases** button located on the **Product Selector** page. This button will appear after you Sign in from the Product selector page.
