

Quarterly past performance figures as at 30 June 2020

We have calculated the performance on a bid to bid basis as at 30 June 2020 and shown it after deducting the Annual Management Charge. Annual management charges include the costs to administer and manage the investment fund, but not individual plan charges.

Please remember: Past performance is not a guide to future performance. Unit values can fall as well as rise which means you may get back less than you invest. Exchange rates may also cause the value of underlying overseas investment to go down or up, where applicable. As the growth figures do not reflect individual plan charges at the date on which you invested, they do not show the exact return on your plan. For this reason, please do not use the table to work out the exact value of your plan.
